

This is when the wall comes down  
This is when I give myself  
To every inch of me that says  
It's time to go

The voice is clear but not alone  
Doubt has made my head it's home  
And I can hardly hear myself explode  
Someone tell me something good  
Something I can really use

Here I go, say goodbye to everything I know  
Here I go, I love you till the end of time  
I have to do this on my own  
So here, here I go

On the edge of everything  
The start, the end, the in between  
But somewhere through my fear  
I know I'm fine

Nothing like the way it's been  
An open door I've never seen  
And I can't help but wonder what's inside  
Someone tell me something good  
Something I can really use

Here I go, say goodbye to everything I know  
Here I go, I love you till the end of time  
And I have to do this on my own  
So here, here I go

Sure I guess I must be strong  
But what if I am just very wrong  
And what if I don't know  
Where I belong

Here I go, say goodbye to everything I know  
Here I go, I love you till the end of time  
I have to do this on my own  
So here, here I go, here I go
