

Night & Day

Sarah Blasko

Words in to space, into unfair terrain
They are gone now exited my mouth
Words find you cold, actions are too bold
How can we bridge this divide

We're like night and day, like night and day
A bitter night and a broken day

You'll never change, always the same
While I move quicker than the tides
But yours is a face my mind won't erase
And I know I can't say goodbye

We're like night and day, like night and day
I love the nights you seek the day
They're just nights and days that we while away
They're just nights and days, just nights and days
Oh how can we grow old together
Oh how can we grow old together

We're like night and day, like night and day
We're like night and day, we were born this way
We're like night and day, like night and day
Such a lovely night and a beautiful day
