Closer

Sarah Brightman

I'm ready for love for the first time Ready for love and I know I'm coming home to the stars My heart is in flight My dreams are alive, I can feel it I know that there's something insight

I'm falling into the sky It's taking me over now I'm getting closer now

Oh, I'm feeling closer now Feels like riding a wave You're like the sun and your light just radiates.

I'm ready for love for the first time Ready for love and I know I'm coming home to the stars My heart is in flight My dreams are alive, I can feel it I know that there's something insight

I'm falling into the sky It's taking me over now I'm getting closer now

Oh, I can feel it again Oooh It's taking me over now

I'm ready for love I'm ready for love for the first time Take me away Take me away to the stars

I'm ready for love for the first time Ready for love and I know I'm coming home to the stars

My heart is in flight My dreams are alive I can feel it I know that there's something insight

I'm falling into the sky It's taking me over now I'm getting closer now

Running, running, running Ahh-ahhhh ...
