

# Him

Sarah Brightman

When late at night I fall asleep  
With all the lights down dimm  
I let my mind soar up above  
Go searching for the one I love

I dream all night of him  
I dream all night of him

He stays with me the whole night through  
Through space and time we swim  
He loves me in a thousand ways  
The nights helps me to face the days

I dream all night of him  
I dream all night of him

I wait each night for sleep to arrive  
Though darkness is when I come alive  
And in the morning when I wake  
The day outside looks grim  
I look back on the night that's gone  
It gives me strength to carry on

I dream all night of him  
I dream all night of him

I never sleep alone for I seek  
To have him with me in my dreams  
Though every morning when I wake  
The day outside looks grim  
I look around and then I see  
Him laying there; he's next to me

I didn't dream of him  
I didn't dream of him
