

## Carry My Love

Sarah Geronimo

If there is something then at least just say it  
I wanna know what this could mean for us  
What do you have when it happens?  
I think they call it love  
I'll take a breath and let my feelings show  
Cause we're exploring territories never known  
Like the first time you sing  
And all of the happiness it brings

Carry my love thru all the seasons  
Carry my heart inside the reasons  
You are my prayer - my every thought  
That I will guard at any cost  
You are my safe inside the storm  
And in your arms I am at home  
Every emotion that's uncharted  
Gives me a joy from where we started

No matter if we take it slow  
It doesn't really change a thing, you know?  
It's like you fall thru the floor  
And everyday being born into our love again  
We're like the seams inside the picture we have sewn  
And our reflection shines on every cornerstone  
Our world begins with dawn  
It's guiding us thru the midnight stars

(you're all my dreams)  
We keep the best things and the good we have  
(you're everything)  
We count our blessings everyday we can  
(safe in my heart)  
I wanna say the words and know they're truthful  
(I love who you are)  
With all the love around you know I need you  
(without you I'm lost)  
You are a dream I hope will never end  
For all the beauty of you making love to me again  
Tell me I won't be alone  
That we'll be together for all time
