

If You Could Read My Mind

Sarah Geronimo

Everyday I realize a feeling that I cannot hide
From you my friend if you could read my mind
Everyday I'm hypnotized everytime
you look and smile at me
I see the heaven in your eyes

And everyday's a special day and
every place a special place
With you my friend when I'm with you

If you could read my mind if you could only see the signs
I'll be yours from now just take this heart of mine
I will be your everything and more
I could be the one you're looking for
For all we know my friend for all we know
If you could read my mind

I never thought that fairy tales
Wishing wells or happy tales come true
But they do, Everyday (time) with you
Everytime I'm feeling blue
All I have to do is think of you and then
You'll fill my heart with love I never knew

I'll never waste a single day
With you I'm always all the way
With you my friend when I'm with you

If you could read my mind if you could only see the signs
I'll be yours from now just take this heart of mine
I will be your everything and more
I could be the one you're looking for
For all we know my friend for all we know
If you could read my mind

When problems get me down
Only you can make the day end right
When I'm with you

If you could read my mind if you could only see the signs
I'll be yours from now just take this heart of mine
I will be your everything and more
I could be the one you're looking for
For all we know my friend for all we know
For all we know my friend for all we know
If you could read my mind
If you could read my mind... if only you could read my mind
