

What If I

Sarah Geronimo

I see that she has hurt you bad
I think that it's really sad
that she's made a cynic of you now
If only you'd let me try
I think I could change your mind
and show you what true love's all about

I know what you're going through
take your time I'll be here for you

You say you'll never be ready for love
You say that you have had enough
but what if I, what if I
could love you forever
you say you can't afford anymore
to have your heart broken like before
but what if I, what if I
we're the one you needed all this time
What If I told you
I'd make you forever mine

I don't believe at all
you'd ever be all alone
cause I know just what you're looking for
Someone who will stand by you
whatever life takes you through
and be there for you forevermore

What if there's a reason that I
have come into your life
just when you needed a friend
You have got to open your mind
maybe now there's no time
you're about to find love that will never end
never end...
