

I Want Out

Sarah Jaffe

Would you have asked me
If I didn't tell
For each little mind game
It's own separate hell
Something needs crying over
I can't pull it out
Something I'm mindful of
I don't want to be alone

But I was once a little girl who roamed the fields
Until now I've forgotten how it feels
When all you want is to be outside
Where the light is
I want out

If some false impression
Would get me through the door
I'd feel a lot better
Than trying to ignore
That you've kissed a history
You've slept with the past
I was real small once
With a childlike laugh

But I was once a little girl who roamed the fields
Until now I've forgotten how it feels
When all you want is to be outside
Where the light is
I want out

But I was once a little girl who roamed the fields
Until now I've forgotten how it feels
When all you want is to be outside
Where the light is
I want out
