

Make This City Ours Tonight

Sarah Vaughan

Magic expectation, the evening is starting to shine
Neon-colored romance, the promise that you could be mine
Dreams are full of music, my heart memorizes the song
I want to dance on the rooftops so don't keep me waiting so long

My imagination is changing the skyline we know
Step into my fantasy and, baby, don't let me go
We must be the best thing the eyes of this town ever seen
Feels like we've started a party and covered the city with dreams

I don't wanna see the morning coming
I don't want the dark to turn to light
I can feel a dream about to happen
Gonna make the city ours tonight

Traffic's going nowhere, we're glad just to walk hand in hand
Shadows move in time to the rhythm of woman and man
We must be the best thing the eyes of this town ever seen
Feels like we've started a party and covered the city with dreams

We must be the best thing the eyes of this town ever seen
Feels like we've started a party and covered the city with dreams
Feels like we've started a party and covered the city with dreams
