

## Volcanian Sun

Sarea

This is the rise of the beginning  
A new dawn, the last light we'll see  
It has been here all along  
It was just a matter of time before

Light the world with my fire now  
The end of earth is here

Volcanian sun, rise to shine, to devour  
The beautiful irony, now we see the light

Those who seek the peace and calm  
Are the same that rage into war  
Of all the prophecies that man has set  
The one of our demise will come true

Light the world with my fire now  
The end of earth is here

Volcanian sun, rise to shine, to devour  
The beautiful irony, now we see the light

Now we see the light...
