Love In Return

If you wanna get If you wanna get If you wanna get

If you wanna get to know me Then you gotta show me Can you be there for me Are you strong enough Can you be my friend till the very end When I give you love Will you give me love in return

When you're close to me I can't help it I'm staring right through you Wondering why You dont notice I'd do anything My friends say you know my name It's just not the same

[repeat]

You keep playing the shy guy around me Pretending you're too cool Tell me you're free There's no body You want more than me

My friends say you know my name It's just not the same
