

That Song

Satanic Surfers

I could write a thousand songs about my anger but it wouldn't change a thing in this world
I know that for a fact but it makes me feel a whole lot better
That's why I do this in the first place

I could write a thousand songs about my anger but it wouldn't change a thing in this world
I know that for a fact but it makes me feel a whole lot better,
that's why I do this in the first place

It's not my purpose to speak for anyone else, hold no answers
Nor solutions, that song can only bring consolation for a while
but it cannot act on your behalf so if you are aware and you know where the problem hides, don't sit around blaming it on society, that song might be a tool of revolution but it sure ain't meant as a commodity so

Sing along to the slogan filled refrain but don't let it numb your brain, change doesn't come in any song

That song won't save us [x2]
