

# Stranger World

Satariel

The world comes down on us  
Strangling you speechless  
And what you see can't be understood  
We are dying fast, nothing will last

Bruised and beaten badly  
Swollen, numb and blue  
We shall kill ourselves  
For we are an expandable breed

Oh, stranger world  
You are a dangers world  
Oh, stranger world  
I don't know you now

There's a breach in our covenant  
For we found heaven to be empty  
God was a split atom  
We are left to die

We must kill ourselves  
For we turned a sickened breed

The world is my enemy  
Cleanse the universe from our spinning rock  
We are a plague raging senseless  
Thus I proclaim myself nemesis

Bruised and beaten badly  
Swollen, numb and blue  
We do kill ourselves  
Oh, what a blessed relief

[CHORUS]
