

Lucky Number

Saves the Day

In the night when you're alone
In the dark and the unknown
You can always come back here
I'm home

No lucky number or save the date
No way to know when it will change
No invitation or long lost friend
No I don't mind, I'll take you in

Their voices through the walls of your head late at night
Say please leave me alone
Now get out of my sight
So when theres no where left to go
Come back home, it's all right
Together make it on our own
One way give up or try

No hallelujah or holiday
No way to know if it's okay
No flawless figure or alibi
Let's have a toast to time gone by
They rise around your back
Rolling up to the sky
So glad that you could come
Half a smile, walk away

So when theres no where left to go
Come back home it's all right
Together make it on our own
One way give up or try

In the night when you're alone
In the dark and the unknown
You can always come back here
I'm home

No easy way out or IOU
No I know just the thing to do
No I'll be waiting here for you

The letter with the words "never loved you at all"
And if this is the end, I'll be glad when you're gone
Oh well, no matter what they said
Come back home its alright
And when theres nowhere left to go
Somehow get through the night
Together make it on our own
One way give up or try

In the night when you're alone
In the dark and the unknown
You can always come back here
I'm home
