

Radio

Saves the Day

Hearing the words as they're leaving my mouth
I can't believe myself
Trying to be what you want me to be
I guess I can't catch up

Once in awhile, making you smile
by singing with the radio
You're singing with the radio

Staring into space like I'm not even there
I swear I'm not alone
You make me think that I live with a ghost
But my love still grows

Once in awhile, making you smile
by singing with the radio
You're singing with the radio
We heard it on the radio

They're singing (Ohhhhh)

Once in awhile, making you smile
by singing with the radio
You're singing with the radio
We heard it on the radio

You're singing with the radio.
