

# Stand in the Stars

Saves the Day

Let's at least give it one more-another try.  
In your eyes I can see for a thousand miles.  
Out in between where the ocean becomes the sky.  
where we can go get so lost we can't find the time.

I wanna go all the way.  
What do you say?  
While tomorrow's memories are ours to make.  
Don't hesitate.  
So maybe some day after midnight before morning  
Meet me to stare down the moon.  
Lets take in the air in the space in between us  
Til nothing is left save us two.

Take the car to the coast, drive right off the pier.  
Making the highway our runway, and shifting gears.  
Behind the clouds take off into the atmosphere.  
We'll get so high up the whole world will disappear.

I wanna take you away, what do you say?  
While tomorrow's memories are ours to make.  
Don't hesitate.  
So maybe some day after midnight before morning  
Meet me to stare down the moon.  
Lets take in the air in the space in between us  
Til nothing is left save us two.

We'll stand in the stars  
Spinning in a circle sideways  
Silhouetted by a hundred million burning constellations.  
I'm Orion upside down,  
In my arms you're Artemis,  
Our love so out of control.

I wanna make our own way  
What do you say?  
Yeah, tomorrow's memories are ours to make  
Don't hesitate.  
Tell me yes, no, maybe so?

Maybe some day after midnight before morning  
meet me to stare down the moon.  
Lets take in the air in the space in between us  
Til nothing is left save us two.  
We'll stand in the stars.  
Spinning in a circle sideways.  
Silhouetted by a hundred million burning constellations.  
I'm Orion upside down,  
In my arms you're Artemis,  
Our love so out of control.

Oooh whoaaaaa.
