

# The Tide of Our Times

Saves the Day

This is the tide of our times  
The last time a war was on ratings or soot  
The network of businessmen clamored for more  
"The conflict and competition on TV  
Will keep them all watching for weeks," they would say

This is the story of territory  
The target is taken  
No one forsaken  
Love take my hand if together we stand  
Then we won't have to worry  
This is the tide of our times

The minister of public surveillance found  
The president of population control  
The riots and regular robbing of stores  
Have stopped coinciding with the call for war

We all march along  
Our mothers, our fathers  
Our soldiers comply  
While starving at home  
Behind enemy lines  
Without knowing why

[Chorus]
