

Me and You

Saving Abel

When it all comes down to me and you
We're all hiding a little lie under the truth
Maybe we should take our time, there's nothing to lose
Cause it all comes down to me and you
Before I let you know know know
I will never let you go go go
Thinkin' you have loved any time, any place anymore
I guess I should've learned learned learned
I could've got burned burned burned
Kinda feels like I've been here before
When it all comes down to me and you
We're all hiding a little lie under the truth
Maybe we should take our time, there's nothing to lose
Cause it all comes down to me and you
It's just another kiss goodbye
Just another reason why
Can't run every time everyone says everything's gone wrong
Cause I won't let you get away

I won't let your arms down me
No use pretendin' anymore
Baby, when it all comes down to me and you
We're all hiding a little lie under the truth
Maybe we should take our time, there's nothing to lose
Cause it all comes down to me and you
When life is hard, when life is hard
And we can't miss all, we can't miss all
When it all comes down to me and you, yea
When it all comes down to me and you
We're all hiding a little lie under the truth
Maybe we should take our time, there's nothing to lose
Cause it all comes down.
Baby, when it all comes down to me and you
We're all hiding a little lie under the truth
Maybe we should take our time, there's nothing to lose
Cause it all comes down to me and you
