## Sharin' The Moonshine

## **Sawyer Brown**

There ain't nothin' that'll rattle your chain Like the top laid back on a Chevrolet And the things the midnight makes you say When you fall in love

And the sundown brings a whole new world With good time boys and late night girls It takes your breath and starts to swirl Under stars above

So, let's share in the moonshine Yeah, we'll share in the moonshine Yeah, we'll share in the moonshine On a hot summer night

When the stars come out and start to play The magic melts the blue away And at the end of every day There's a night-time jubilee

And for her lifetime lover, you can't miss When it starts in the evenin' with a gentle kiss And old man Cupid can't resist It's a twilight mystery

So let's share in the moonshine Yeah, we'll share in the moonshine Yeah, we'll share in the moonshine On a hot summer night

Oh, when the wind is still And the stars are over here And we'll cruise till it's right On a hot summer night

So let's share in the moonshine Yeah, we'll share in the moonshine We'll share in the moonshine On a hot summer night

On a hot summer night On a hot summer night On a hot summer night On a hot summer night
