

# Someone

Sawyer Brown

It must be awful cold up on the moon  
It's dark and it's dusty, there's nothing much to do  
Maybe right now you think that's where you gotta stay  
One of these nights when you feel lost and far away

Someone will come someone who's been needing someone too  
Somewhere out there waiting for at chance at loving you  
And you're gonna let him  
I just wish I knew how long it'll be  
Before you ever see  
The someone is me

You lie awake and listen for a sound  
Prayin' for your angel, to just come swooping down  
And even though your not expecting one to come along  
Better leave the porch light burning just in case your wrong

Someone will come someone who's been needing someone too  
Somewhere out there waiting for at chance at loving you  
And you're gonna let him  
I just wish I knew how long it'll be  
Before you ever see  
The someone is me

You may not believe it when you're out there by yourself  
But there's someone whose never wanted anybody else

Someone will come someone who's been needing someone too  
Somewhere out there waiting for at chance at loving you  
And you're gonna let him  
I just wish I knew how long it'll be  
Before you ever see  
The someone is me
