

# Red Alert

Saxon

We were on the Russian border  
When the news began to break  
Of a nuclear reactor melting down  
Sending deadly clouds of dust  
Into the atmosphere  
Falling down like rain upon the ground

We were laying in the sun  
Listening to the radio  
When someone said you'd better get inside  
We didn't know how serious  
The situation was  
That many people to the North had died

Red alert, red alert  
Screaming in my head  
There's something I'm not sure of going down  
Red alert, red alert  
Screaming in the night  
That fallout seems to follow me around

We made out way to Hungary  
Got ready for the show  
Thinking we were safe there  
From the storm  
But the deadly cloud was high above  
Taken by the wind  
Spreading like a plague across the land  
A threat you couldn't see  
Nothing you could feel  
Something evil floating in the air  
Look towards the East  
For the danger yet to come  
For the Earth  
We make a silent prayer

Red alert, red alert  
Screaming in my head  
There's something I'm not sure of going down  
Red alert, red alert  
Screaming in the night  
That fallout seems to follow me around

We were on the Russian border  
When the news began to break  
Of a nuclear reactor melting down  
Sending deadly clouds of dust  
Into the atmosphere  
Falling down like rain upon the ground

Red alert, red alert  
Screaming in my head  
There's something I'm not sure of going down  
Red alert, red alert  
Screaming in the night  
That fallout seems to follow me around
