

Oh I used to be a violent child
Used to be the girl who lied
Immune to all the sad goodbyes
Got high, wondered how it felt to fly
Cut that little heart of mine
Barely felt alive inside

And I know I should have told you the truth
God knows I've been trying

I've been an angel
I've been a devil too
But tonight I'll be true
I've seen city boys crying
And now you're one of them too
Cause I electrified you
I electrified you

And now the evil that I tried to hide
The instincts that I tried to fight
They come out to play at night

And I know I should have told you the truth
God knows I've been lying

I've been an angel
I've been a devil too
But tonight I'll be true
I've seen city boys crying
And now you're one of them too
Cause I electrified you
I electrified you

I know you have been good to me
Try to tear my golden hair
It was all in vain
Cause I don't think I'll ever change

I've been an angel
I've been a devil too
But tonight I'll be true
I've seen city boys crying
And now you're one of them too
Cause I electrified you
I electrified you
