

# Wilder Than The Wind

Say Lou Lou

Five to final, all the lights go down  
Let's escape this town  
I don't know about you, but if you want to try,  
then I want to try  
Our lives are buried where the moon lights  
and we don't have to hide

We're riding the night,  
Every seconds locked, I'm dying here with you  
And in the sky, when I'm looking back  
nowhere we're running to  
Wilder than the wind tonight!

Stand too still, this place will take its toll,  
'Till our lips burn cold  
I promise you that we could make it out,  
we can make it now  
Our lives are only like this island,  
I get so dark.

We're riding the night,  
Every seconds locked, I'm dying here with you  
And in the sky, when I'm looking back  
nowhere we're running to  
Wilder than the wind tonight!

I see us shinning as we dive into the blue,  
Come alive,  
Like a breath of air reviving rushing through  
Wilder than the wind tonight!  
And then the lights go down, the light go down  
and then the lights go down  
And then the lights go down, the light go down  
and then the lights go down

Our lives are buried where the snow lights!  
We're riding on,  
Every seconds locked, I'm dying here with you  
And in the sky, when I'm looking back  
nowhere we're running to  
Wilder than the wind tonight!  
I see us shinning as we dive into the blue,  
Come alive,  
Like a breath of air reviving rushing through  
Wilder than the wind tonight!
