

Dandelion Necklace

SayWeCanFly

1, 2, 3, 4...

You understand the way I think,
You see my life for what it is,
Not for what it could have been

I could talk for hours with you
'Bout the little things like why the sky is blue
Or how much I love the moon

And sure we have our awkward times
But that's what keeps it cute
Because it makes me happy just to be with you
Just to be with you

I know I'm just that boy who writes the love songs
But when I sing you make the harmony to go along
And I promise I will try my best to keep our love alive
Ooh, because I love to see you smile

Some might say that love can be expensive
But I'm sure that you and I can prove that wrong
I'd be happy with a dandelion necklace
Because I know that it would come straight from your heart
I know that it would come straight from your heart
Straight from your heart

I know I'm just that boy who writes the love songs
But when I sing you make the harmony to go along
And I promise I will try my best to keep our love alive,
Ooh, because I love to see you smile

I love to see you smile [x3]

I know I'm just that boy who writes the love songs,
But when I sing you make the harmony to go along
And I promise I will try my best to keep our love alive,
Ooh, because I love to see you smile

I love to see you smile
