SayWeCanFly

I don't believe you when you say you're on my side
When all you do is coat the world in all your lies
And I believe that we deserve to know what's true
And truthfully, we don't need anything from you, anything from you.

Oh, my lungs are burning from the pain of breathing air affected with your poison!
Oh, my heart is dying just to watch you fall right down!
One by one

I've been a victim of the way you twist our minds
I've seen a million people work until they die
And I believe that you deserve to know what's right
That in the end I promise you will lose this fight
You will lose this fight.

Oh, my lungs are burning from the pain of breathing air affected with your poison!
Oh, my heart is dying just to watch you fall right down!
One by one

Oh, my lungs are burning from the pain of breathing air affected with your poison
Oh, my heart is dying just to watch you fall right down (watch you fall right down)

Oh, my lungs are burning from the pain of breathing air affected with your poison!
Oh, my heart is dying just to watch you fall right down!
