Lady X

Quiet falls the night - Fever rushing through me With weapons sent from heaven You burned the heart in me All alone this night I was searching for the perfect thrill Another liquid shot was rushing through my veins Seduced by neon lights Yet another shot went through me Far away from the twisted reality Blinded in the night - This angel swept my eyes In the darkest corner of town we lost our minds Together through the night Two as one we walk through fire All my worries then was cast behind my back Fire floods in my vein Allowing my mind to spin Some distant headlights blind my eyes If you count the seconds - Minutes turn to years But time of dreaming will last through forever Then the morning came Left weak and barely breathing All dreams began to fall apart She left me in the dark Leaving me with her mark I shared with you the secrets deep inside It puzzles with my mind Every time I close my eyes A mind game that slowly eats at me I can never sleep
