

# (We Got To Learn To) Live Together

Scatman John

We got to learn to live (together, together)  
We got to learn...we got to live (together, together)  
We got to learn...we got to live (together, together)

We've got to learn to live together  
We've got to live to learn right now  
We've got to learn to live together  
And only love can show you how

(Together, together)

An eye for an eye has made the whole world blind  
The battle from the saddle's at the end of its time  
We can take it higher, higher, higher  
Together, hand in hand, we can set the world on fire

The truth is the voodoo's broken out of its shell  
Let's take the golden path and take the hell out of hell  
It only takes a while in the river of denial  
Hey, hey baby look out - here comes the new moon

We've got to learn to live together  
We've got to live to learn right now  
We've got to learn to live together  
And only love can show you how

We got to learn, to live together  
Love will take you higher, higher, higher

Ain't no time to be clever, man, no time to be coy  
The world is too hot to be cool, girls and boys  
Let's pick up the sticks, throw away the bag of tricks  
You can feel the season breathing here in your midst

We don't need another hero, don't need another saviour  
The world needs an ice-cream with a brand new flavour  
The only thing to do now is to pick up the pieces  
The more we spread the joy, the more the joy increases

We've got to learn to live together  
We've got to live to learn right now  
We've got to learn to live together  
And only love can show you how

We got to learn to live together  
Love will take you higher, higher, higher

We got to learn to live  
We got to live to learn

That's right...

We've got to learn to live together  
We've got to live to learn right now  
We've got to learn to live together  
And only love can show you how

We got to live  
We've got to learn to live together  
We've got to learn to live  
Love will take you higher, higher, higher

We've got to learn  
we've got to live

That's right...
