

Been up all night staring at you
Wondering what's on your mind
I've been this way with so many before
But this feels like the first time
You want the sunrise to go back to bed
I want to make you laugh

Mess up my bed with me
Kick off the covers I'm waiting

Every word you say I think
I should write down
I don't want to forget come daylight

Happy to lay here just happy to be here
I'm happy to know you
Play me a song your newest one
Please leave your taste on my tongue
Paperweight on my back
Cover me like a blanket

Mess up my bed with me
Kick off the covers I'm waiting

And every word you say I think
I should write down
I don't to forget come daylight

And no need to worry
That's wastin' time
And no need to wonder
What's been on my mind
It's you
It's you
It's you

Every word you say I think
I should write down
Don't want to forget come daylight

And I give up I'll let you win
You win 'cause I'm not counting
You made it back to sleep again
Wonder what you're dreaming
