

The Birdwatcher

Scooter

Make some noise for the birdwatcher
Let your mind slip and slide
Triggernator hot water
You better lock your daughter

It's deep dark dirty
And it ain't too late
Take a look at your watch
And let me tell it straight
Move your hands down low
And move your hands up high
Move your structure to the ground
And move your structure to the sky

Got the some beef, prove it
Got a problem, don't excuse it
Got a gun in my pocket

And you know that I would use it
Move your hands down low
And move your hands up high
Move you structure to the ground

And move your structure to the sky
Loud and clear
We got the sound
Watch your step

On frozen ground
Move your hands down low
And move your hands up high
Move your structure to the ground
And move your structure to the sky
