

# They Need A Million

Scorpions

I see a rainbow in the sky  
So many colors and the light  
I see the world and I see all the people  
How they're running all the time

I see your shadow over me  
Then in my ears I hear a symphony  
I see the world and I see all the people  
What they are doing what they need

They need a million and a billion  
And your money too  
They need a million and a billion  
And your money too

I feel fine though I realize  
That I don't need the million  
They are all poor

I feel fine though I have eyes  
To see my world and all it skits on ice

I feel fine though I realize  
That I don't need the million  
They are all poor

I feel fine though I have eyes  
To see my world and all it skits on ice
