

They Need A Million

Scorpions

I see a rainbow in the sky
So many colors and the light
I see the world and I see all the people
How they're running all the time

I see your shadow over me
Then in my ears I hear a symphony
I see the world and I see all the people
What they are doing what they need

They need a million and a billion
And your money too
They need a million and a billion
And your moeny too

I feel fine though I realize
That I don't need the million
They are all poor

I feel fine though I have eyes
To see my world and all it skits on ice

I feel fine though I realize
That I don't need the million
They are all poor

I feel fine though I have eyes
To see my world and all it skits on ice
