We Were Born To Fly

Scorpions

Hello again You've been alone awhile And I can use a friend Your shades are down And I've been waiting here for you to come around And it's not about forgiveness Cause it's all about the love anyhow We were born to fly To reach beyond the sky To carry on forever after You and I You keep my faith alive With you I'm not afraid To rise and fall and face disaster You and I We were born to fly Take another breath Just close your eyes my love let nature do the rest Open up your wings And with the wind we'll rise above to higher things We'll forget about tomorrow And we'll live another day today We were born to fly To reach beyond the sky To carry on forever after You and I You keep my faith alive With you I'm not afraid To rise and fall and face disaster You and I We were born to fly We were born to fly We were born to fly To reach beyond the sky To carry on forever after You and I You keep my faith alive With you I'm not afraid To rise and fall and face disaster You and I We were born to fly We were born to fly We were born to fly To reach beyond the sky To carry on forever after You and I You keep my faith alive With you I'm not afraid To rise and fall and face disaster You and I We were born to fly
