

# Upside Down

Scott Matthew

I walk a tight rope  
And live with the high hope  
That somehow we still feel the same  
Through this catastrophe  
It's quietly telling me "welcome"  
There's that word again

For I don't care if the world's upside down  
If you're lost or you're found  
I know my feet will stay far from the ground  
If you'd just stick around

I know the shots you call gentle  
'cause I could fall and break  
You'll hear what they say  
I read between the lines  
Cuts like a hate crime  
And tell me today's not the day

For I don't care if the world's upside down  
If you're lost or you're found  
I know my feet will stay far from the ground  
If you'd just stick around

You hit a high note  
It comes like a cyclone  
And tell me today's not the day

I don't care if the world's upside down  
If you're lost or i'm found  
I know my feet will stay far from the ground  
If you'd just stick around  
With me
