Scott Walker

He was so strong, he was so bold when they made him, they broke the mold if he heads this way, when the moon is slow Come over and pray... they'll turn the buffalo they'll turn the buffalo There's a need to sleep in the shag of his stomach slide around his eye with your love in tow if he heads this way don't you say hello Get out of the way they'll turn the buffalo they'll turn the buffalo Our town our town do love a stampede Stampede by my old jacket in the park Someday I'll pick it up look for the label and whisper Tilt ain't got no no no Tilt got none at all Tilt ain't got no no no A mother waits as still as the moon light Standing in long grass with her cold cold nose What she feels so deep she will never show Baby don't you weep they'll turn the buffalo they'll turn the buffalo Our town our town do love a stampede Stampede by my old jacket in the park Someday I'll pick it up look for the maker and whisper Tilt ain't got no no no Tilt got none at all Tilt ain't got no no no

not at all
