

## Dew in the Grass

Sea Wolf

Here by the river side  
I brought by soon-to-be bride  
Through the fog and smoke  
Watch the geese and the barges flow

She sang in the city dawn  
Wrapped my limbs inside her clear song  
Every car passing by  
Slowed to hear my beloved's sigh

And the dew in the grass had an electric glow  
Yeah, the dew in the grass had an electric glow

And the light cut right through  
Through our skin, through our bones  
Yeah, the light cut right through  
Where it glows  
And it glows

Way up where the lighthouse runs  
Heard the crack of the hunters' guns  
She held onto my hand  
Drew our names in the river's sand

And the dew in the grass had an electric glow  
Yeah, the dew in the grass had an electric glow

And the light cut right through  
Through our skin, through our bones  
Yeah, the light cut right through  
Where it glows  
And it glows

And coming down in the cold, cold fluorescent  
We watched the branches in the water drifting  
I said I'd never let it happen to you  
I said I'd never let it happen to you  
And the hunters coming down won't bother us with their sounds  
No, the hunters coming down won't bother us again with their sounds

And the dew in the grass had an electric glow  
Yeah, the dew in the grass had an electric glow

And the light cut right through,  
Through our skin, through our bones  
And the light cut right through  
Where it glows  
And it glows
