

With a softship,
Didn't know where I was going
We'll always find a way,
Let you know my blood is flowing

You see right through her heart
To keep from showing
When my heart is glowing
It kept us awake all night
Hoping that one day we might, sing together

And I rose up
With the waves in the water
And I rose
With the waves in the water

I tore up the forest
Didn't fear anything at all
I'll always find a way
Take you apart, put you back together
Put my name into her eyes
To keep from falling
Out of the stars

And I rose up
With the waves in the water
And I rose
With the waves in the water
