

# Smoke

## Seabound

We are addicted  
Addicted to your habits  
We are distressed when  
You're not around

Keep the fire burning  
Keep the smoke coming  
(Smoke)

Our days are wasted  
If we don't receive your comfort  
You cast a spell  
You silence every sound

Brothers become enemies  
Prepared for any felony  
Craving for felicity  
Ready for atrocity

You strike a match and you smile  
And all I can do  
Is smile together with you

You lace the wine with a single tear  
You are the force I used to fear

The smell of gas is spreading  
Yet all I can do  
Is keep on smoking with you

Your eyes sparkle, you're sincere  
You are the force I used to fear

Lost in reverie  
I dream of sights I will never see

We are enchanted  
By your need of protection  
Soft and fragile  
Sensitive ground

Keep the fire burning  
Keep the smoke coming  
(Smoke)

We are bewitched  
By your deep understanding  
And we will defend  
The security we found

(You silence every sound)

Brothers become enemies  
Ready for atrocity

You strike a match and you smile  
And all I can do

Is smile together with you

You lace the wine with a single tear  
You are the force I used to fear

The smell of gas is spreading  
Yet all I can do  
Is keep on burning for you

Your eyes sparkle, you're sincere  
You are the force I used to fear

Lost in reverie  
I dream of sights I will never see  
I dream of words I will never hear  
You are the force I used to fear
