

Belt

Seafood

We were found by rocks and cliffs
And with restless words we set about
To settle down by the long tall pines a...
Final chance to escape from these crowds

But I'm so hopeful about me know
I feel so safe with nothing much
As you came to confuse my life with...
Your simple thrills and a force-fed love

Watch yourself, watch yourself now
It's your life, it's your life
Take good care, take good care now
It's alright, it's alright

I'm so tired of all the wasted
Time you slept in our finest hour
But there's a thread that will keep us tied to
Your safe routine and a friendly smile

Watch yourself, watch yourself now
It's your life, it's your life
Take good care, take good care now
It's alright, it's alright

I'll watch burn here in California
But we'll survive here, we'll survive here
We'll survive here, we'll survive here
we'll survive here, we'll survive here
You get the feeling this is your last shot

Watch yourself, watch yourself now
It's your life, it's your life
Take good care, take good care now
It's alright, it's alright
