## **Dear Leap The Ride**

Seafood

It's a shame, but its funny how I Could never find the words to describe How I feel, so restless for more Guess I'll wait like I've waited before

So pleased to know we will get there in the end To leap the ride and take a step back from the edge

The sinking ship has left me for dead Nothing to lose but the mess in my head And you could call, you could call me anytime And you could call, you could call me if you like

So pleased to know we will get there in the end To leap the ride and take a step back from the edge From the edge From the edge

A way of letting go, a way of saying goodbye A beautiful reward will come to you in time
