Seafood

Party's over, summer's gone
You'll have left here before too long
But what do you know, sat here again in autumn shades
And it's alright just for now we're safe

Shaking trees bring a smiling face
Startled eyes through a smoky haze
But what do they know and why should we care what they say
But it's alright, just for now we're safe

You gotta get out for what is over
You gotta get out to go explore
You gotta get up for what you're missing
You gotta get up for me once more

So what do you know, sat here again in autumn shades
And it's alright just for now we're safe

You gotta get out for what is over
You gotta get out to go explore
You gotta get up for what you're missing
You gotta get up for me once more

You gotta get out for what is over
You gotta get out to go explore
You gotta get up for what you're missing
Once more

We'll take our time just to get a little high
And we'll take our time just to get a little high
