

The Worst Parts

Seasons After

The worst parts are coming true
The worst parts are coming true

Survive the night
Or find out what's behind the wall
Time to believe this
We're witnessing the end of all

Before the morning comes
It'll come to take us
Don't fall asleep tonight
You'll never wake
Don't shoot the messenger
Just hear the warning
Of mother nature's wrath
And our fate

And it will seem to come from nothing
Work its way right into you
The time has come to reach for something
The worst parts are coming true

It's not enough to know
The end is nearing
Reactionary tale
Come to pass
The billions calling out
No one hears them
So bow your head and pray
The last mass

And it will seem to come from nothing
Work its way right into you
The time has come to reach for something
The worst parts are coming true

Survive the night
Or find out what's behind the wall
Time to believe this
We're witnessing the end of all

And it will seem to come from nothing
Work its way right into you
The time has come to reach for something
The worst parts are coming true
The worst parts are coming true

The worst parts are coming true
The worst parts are coming true
The worst parts are coming true
The worst parts are coming true

The worst parts are coming true
The worst parts are coming true
The worst parts are coming true
The worst parts are coming true
