

The Alphabet Song

Second Person

I love my love with every letter of the alphabet
I love my love in every language I know
I love my love in ways I haven't counted yet, oh oh
My love my love my love I love you so

I love my love with an A for his amazing grace
I love my love with a B when he is blue
I love my love with a C if he's capable of loving me
I love my love with a D because I do

I love my love with an E for the earth I'd give him
I love my love with an F for the faith I keep
I love my love with a G for his gentleness and empathy
And I love my love with an H when he's asleep
I love my love with every letter of the alphabet
I love my love in every language I know
I love my love in ways I haven't counted yet, oh oh
My love my love my love I love you so

I love my love with an I though his ignorance can make me cry
I love my love with a J when my jealousy strikes
I love my love with a K for the kamikaze way I have to play
I love my love with an L if it's me that he likes

I love my love with an M for the masochist I am
I love my love with an N for the never it seems
I love my love with an O for the only way that this can go
And I love my love with a P for the perfection of dreams

I love my love with every letter of the alphabet
I love my love in every language I know
I love my love in ways I haven't counted yet, oh oh
My love my love my love I love you so

I love my love with a Q for his qualities
I love my love with an R for his respect for my rhymes
I love my love with an S for our strength when under such duress
I love my love with a T in these turbulent times

I love my love with a U cause he's undecided as to what to do
I love my love with a V cause his vows are unsaid
I love my love with a W, does it trouble you he has no point of view
I just love my love because of X, and Y, and Z

I love my love with every letter of the alphabet
I love my love in every language I know
I love my love in ways I haven't counted yet, oh oh oh
My love my love my love I love you so

I love my love with every letter of the alphabet
I love my love in every language I know
I love my love in ways I haven't counted yet, oh oh oh
My love my love my love I love you so
My love my love my love I love you so
Oh, oh, my love my love my love I love you so
