

A fortune teller told me  
How glowing lights can take me away  
Mindful and controlling  
Abduction leads to surgery

Some enjoy the ride  
But some commit to suicide

They're using chemicals  
To alter animals and their biology  
They're using animals  
To gain a better known technology

Their skin is soft and white and sensitive to light  
And deep inside as parts are realigned  
Anesthetic soothes your mind

Some enjoy the ride  
But some commit to suicide

They're using chemicals  
To alter animals and their biology  
They're using animals  
To gain a better known technology

I don't look back on anything that will feed my anxiety  
I don't look back on anything soft and glittering  
Night's alive and empty stars are your disguise

They're using chemicals  
(To alter animals and their biology)  
They're using animals

They're using chemicals  
To alter animals and their biology  
They're using animals  
To gain a better known technology
