

## Lights On

Secret Sphere

Have you ever felt what means to long for night to come?  
Have you felt the energy is burning hot?  
Tell me just one better thing than people screaming  
Tell me what is better than this stage

Notes fly free, sweat, savage bodies push each others and  
Music turns into pure instinct  
Too many times we have wondered and cried  
We've been fighting while dreaming this stage  
With our eyes shut  
Now we are here there is not only  
One little thing that is less precious  
That the one in our dream...

You can never know the place  
But we will always find  
Sounds and lights on, as in dreams  
You can only feel

Every word or note is made for all of you  
For what you give to us during these years and the ones to come

Heart and anger, fire burning  
Heart and anger, power rising

"Every nomad got a home where every night his heart goes to sleep"  
Tonight we're on stage, tonight on this stage  
Just for this night you can be with us for real  
Just for this night this can be your home with us
