

The butterfly dance

Secret Sphere

In this time we live, here we breath
I've been so far from home for love

And I'm watching you, breathing you, dreaming you
I am so confused of what moves inside
Deep inside of me, in a dark heart
Like a butterfly dance, brings the sun

And we're here tonight, laying together where clouds rest by
And you're here with me
Stucked in my old memories, far beyond the pain

In this time we live, here we breath, in a dream
We've been so far until today
World is here, take my hand, make me live
I'm so far away from home, just for you

More than love
Just like me you're chasing the truth
Where nobody dares you walk through the fears
You fly over and deep inside me
Playing with a heart that was still
Like a butterfly dance the sun you bring

And we're here tonight, laying together where clouds rest by
And you're here with me
Stucked in my old memories, far beyond the pain

In this time we live, here we breath, in a dream
We've been so far until today
World is here, take my hand, make me live
I'm so far away from home, just for you

Like an orchestra you fill my mind
And we're here tonight, laying together where clouds rest by
And you're here with me
Stucked in my old memories, far beyond the pain

In this time we live, here we breath, in a dream
We've been so far until today
World is here, take my hand, make me live
I'm so far away from home, just for you
