

# Seven Bells

## Secrets of the Moon

o god forsaken universe  
chaos from order  
nuit is lost  
once the first bell tolls

and you know nothing of him  
and you know nothing of sin  
rape the crystal statues of light  
and it will kill you from inside

seven bells  
they are the prophets  
bringers of death

seven bells  
enlighten our paths  
to the glorious pits

seven bells  
they are the all  
and this is our conviction

seven bells  
the holy saviors  
eat their sacraments

the child will grow up  
the naked splendour of nuit  
come forth o children  
this is the joy of the earth

for he is ever a sun  
and she is ever a moon  
and we are ever the stars  
understand, understand  
then sleep

seven bells  
they are the prophets  
bringers of death

seven bells  
enlightening our paths  
to the glorious pits

seven bells  
they are the all  
and this is our conviction

seven bells  
the holy saviors  
eat their sacraments

a new coming
