

You & I

Seed

You and I gonna walk on forever
the moon will guide our way
girl I know that
you and I gonna walk on forever
until our dying day
The past, gone and over, let the future come
grab what you can, girl, let us hit and run
don't you wake the sleeping, don't make a sound
and before sunrise we'll slowly sneak out of town
We hear the hounddogs howl from the past (we have to run)
I hear you breathing and my heart pounds fast
run up the rocky road swim across the sea (we'll overcome)
I swear we'll lose them for they're far too weak
You and I gonna walk on forever
the moon will guide our way
girl I know that
you and i gonna walk on forever
until our dying day
Smell the ash and sulfur, escape's our only hope
the earth has started shaking behind the velvet rope
why do settle for less? Our love deserves it all
this city is a mess, I know it's about to fall
They may hold grudge against you and I
but we don't let them even close to our life
under black skies we move into a new dawn (we'll overcome)
the past behind us as we kepp moving on
You and I gonna walk on forever
the moon will guide our way
girl I know that
you and i gonna walk on forever
until our dying day
You and I
You and I
