

Crush

Selena Gomez & the Scene

1. I guess I should've known
It wasn't gonna end okay
You're such a trouble maker
But I like you just that way
A bomb tick ticking with me
The one I'd best to blame
Just like I can't tell
And I'm ready to blow
I sat around a lot and thought
About the world without you
And no matter what you think
Everything is not about you
You think I'm still
hung up on you
But baby it's not true

*: Now look at me
Your memories turn into dust
There's only one explanation

R: I wasn't really in love
I wasn't really in love
It was just a crush
It was just a crush
Sparks fly when we touch
It was never enough
It was just a crush
It was just a crush
Yeah

2. You found one the things you need
There's nothing left to lose
The things I never wanna be
I owe it all to you
You just can't help yourself
It's what you do
Cause this is real life
Not your show

*: Now look at me...

R: I wasn't really in love...

You'll be fine
Just find another girl
To kick around
Won't be long
Until they all know what
I figured out

R: I wasn't really in love
I wasn't really in love
It was just a crush
It was just a crush
Sparks fly when we touch
It was never enough
It was just a crush
It was just a crush

Yeah

It was just a crush
yeah!
