

If you feel the way I feel
take my hand, It'll be unreal
When we jump i'll tell the truth
I can't take my heart from you
I feel you with blessed touch
Want to tell it you so much
The coldness of you makes me sick
Will we meet another week?

I give you all my spirit Come and take it
You can't be blind since you first felt it
You can see my wings when your eyes are closed
Come fly away with me

Drive into the oncoming
Feel my heart is burning

You will not find the perfect me
Wake and find paint on your skin
When you read text upon your back
Not all whispers would be black

I give you all my spirit Come and take it
You can't be blind since you first felt it
You can see my wings when your eyes are closed
Come fly away with me

Drive into the oncoming
Feel my heart is burning
