

Are You Okay

Sense Field

you know how friends are funny when, when we're just clowning a round...

you know how friends get crazy when we can't stop messing around...

we always leave a seat open for you when we go out, out on this town...

we always drink a couple for you when we're all out... when we go out...

just think of us together whenever you're down...

are you okay...

are you alright...

do you count down the days like I count down the nights...

you know that I wait and I wait and I wait...

remember nights when our friends had to help carry us home...

remember times when we'd wake up in places we didn't know...

there was always a light on for us, always guiding us home... to help find our way home...

just think of us together whenever you're down...

are you alright...

are you okay...

they kept your room just the same as when you went away...

are you alright...

are you okay...

they kept the pictures of us before you went away...

just know that I wait and I wait and I wait...

just know that I hope and I pray you're okay...
